Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-25 are rejected under 35 U.S.C. 103(a) as being unpatentable over Gray et al., (US 6,795,875).

As per claims 1, 7-13, and 15, Gray teaches method/apparatus for allocating memory bandwidth comprising:

assigning a fixed priority of access to memory bandwidth (via data reservoir) to one or more direct memory access (DMA) machines (118, Fig. 2, 3, 6) ; and

assigning a programmable priority of access to memory bandwidth to a processing unit (221 or 222 of 220, Fig. 6);

wherein the programmable priority of the processing unit allows priority allocation between the one or more DMA machines and the processing unit to be adjusted dynamically. (Abstract, cols. 2-12)

Gray assigns a priority of access to memory bandwidth via the data reservoir and it would have been obvious to one of ordinary skill at the time the invention was made that depending on the whether the device has high or low bandwidth requirements then the DMA engine will allocate the memory bandwidth efficiently.

As per claims 2-4, 6, 14, 16, and 17-25, Gray teaches assigning a fixed priority to one or more DMA machines including assigning a fixed priority to one or more DMA channels corresponding to the one or more DMA machines.

As per claim 5 and 18, Gray teaches programmably alternating priority between the processing unit (220, Fig. 2) and the one or more DMA machine (118).

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Tammara Peyton whose telephone number is (571) 272-4157.
